About KCMT

Khandelwal College of Management Science & Technology (KCMT), Bareilly, established in 2001, is a registered non-government, non-profit educational organization dedicated to education, training, research, and consultancy across multiple disciplines. Since its inception, KCMT has emerged as a leading institution of higher education in Rohilkhand Region of Northern India, nurturing an environment where dreams are nurtured, inspiration is provided, and achievements are realized. KCMT offers a wide spectrum of AICTE-approved postgraduate programs such as MBA and MCA, alongside postgraduate courses like M.Com and M.Sc. At the undergraduate level, the college provides career-oriented programs including BBA, BCA, B.Com, B.Sc and Education courses. These programs are affiliated with M.J.P. Rohilkhand University, Bareilly, while professional postgraduate courses are affiliated with Dr. A.P.J. Abdul Kalam Technical University, Lucknow.

Commitment to Excellence -At KCMT, education is not limited to the classroom. The institution emphasizes skill-building, innovation, research, and value-based learning. Through seminars, workshops, industry interactions, and extracurricular initiatives, KCMT ensures that its students evolve into confident, competent, and socially responsible professionals. The KCMT campus offers a picturesque and serene environment within 14 km of Bareilly city on the Bareilly–Pilibhit Road. The college is well-connected to major hubs including Delhi, Lucknow, and the hills of Uttrakhand.

About ICSSR

The Indian Council of Social Science Research (ICSSR) was established in 1969 by the Government of India to promote, coordinate, and fund research in the field of social sciences. It plays a pivotal role in strengthening the quality of research by supporting projects, fellowships, training programs, seminars, and publications.

ICSSR operates through its regional centres across India to decentralize academic and administrative functions, ensuring wider outreach and inclusion of scholars from diverse institutions. With its vision of advancing high-quality, socially relevant research, ICSSR continues to contribute significantly to knowledge creation, policy formulation, and the academic development of young researchers in India.

About Workshop

The Five-Day ICSSR-Sponsored Research Methodology Workshop on the theme "Bridging Theory and Practice: Enhancing Research Competencies in Social Sciences" is designed to strengthen research skills and methodological understanding among young faculty members, doctoral scholars, and postgraduate students.

This workshop aims to bridging the gap between theoretical knowledge and practical application by offering intensive training in research design, qualitative and quantitative methods, data collection tools, and statistical software. Participants will gain exposure to both traditional approaches and contemporary innovations in social science research, enabling them to undertake studies that are academically rigorous and socially relevant.

The program structure combines interactive lectures, hands-on sessions, group discussions, and peer presentations to provide a holistic learning experience. Special emphasis will be placed on students capacity building, academic research, referencing, ethics in research, and AI techniques in drafting.

By the end of the workshop, it is hopeful that participants will be equipped with the competencies required to formulate research problems, analyze data effectively, and contribute meaningful scholarship that connects academic inquiry with real-world challenges.

Objectives

- To strengthen the conceptual and theoretical understanding of research methodology in social sciences.
- To provide hands-on training in quantitative and qualitative research methods.
- To develop skills in research design, data collection, analysis, and interpretation.
- To promote ethical research practices and academic integrity.
- To guide participants in research paper writing, referencing, and publication.
- To expose scholars to funding opportunities and proposal writing strategies.
- To enable scholars to use digital tools and software like SPSS, python, and Excel in their research.

Registration Form

Name (in Block Letters):
....
....

Gender: ....

Category: (SC/ST/OBC/General/DA)
